

Note: The scores for this site may not be accurate before running with sufficient live traffic. Please see [our developer site](#) for more information.

Adding reCAPTCHA to your site

Keys

Site key

Use this in the HTML code your site serves to users.

```
6Le0mYUUA AAAAKX0Hf0fHFOAZ4V3MCyF1UADshpN
```

Secret key

Use this for communication between your site and Google. Be sure to keep it a secret.

```
6Le0mYUUA AAAAAPHNbDmltb5nRN3bojW9OEWiAXhL
```

Step 1: Client side integration

Paste this snippet before the closing `</head>` tag on your HTML template:

```
<script src='https://www.google.com/recaptcha/api.js?render=6Le0mYUUA AAAAKX0Hf0fHFOAZ4V3MCyF1UADshpN'></script>
```

Paste this snippet in the JavaScript callback for an action on your website.

```
<script>
  grecaptcha.ready(function() {
    grecaptcha.execute('6Le0mYUUA AAAAKX0Hf0fHFOAZ4V3MCyF1UADshpN', {action: 'action_name'})
      .then(function(token) {
        // Verify the token on the server.
      });
  });
</script>
```

The [reCAPTCHA documentation site](#) provides details on client side integration for v3.

codebb.pl, localhost

response (required)	The value of 'g-recaptcha-response'.
remoteip	The end user's ip address.

The [reCAPTCHA documentation site](#) describes more details and advanced configurations.
